

ECOSLO Tree Management Platform Product Documentation

Product Overview

Purpose

The ECOSLO Tree Management Platform is designed to replace ECOSLO's manual spreadsheets workflow for tracking planted trees, managing Tree Keepers, and coordinating tree maintenance activities. The platform centralizes tree records, volunteer information, automated reminders, task management, and public-facing tree exploration into a single system.

The platform helps ECOSLO maintain accurate tree data, improve communication with Tree Keepers, automate recurring maintenance reminders, and provide public visibility into community tree planting efforts.

Main Features

1. Tree Dashboard (Admin)

- Centralized database of all active and graduated trees.
- Searchable and sortable table of tree records.
- Add, edit, and delete tree entries.
- Mark trees as Active or Graduated.
- Export tree data as CSV.
- View maintenance information, survey history, and tree details.

2. Members Dashboard (Admin)

- Manage Tree Keepers and administrators.
- Store volunteer contact information.
- Assign roles and tree responsibilities.
- Search, filter, add, edit, and remove members.
- Export member data.

3. Public Tree Map

- Interactive map displaying tree locations.
- Search and filter trees by status and visibility.
- View tree information through marker popups.
- Accessible to the public without authentication.

4. Tasks System

- Create maintenance and administrative tasks.

- Assign tasks to individuals or groups.
- Track completion status.
- Connect surveys to task completion when required.

5. Automated Reminders

- Create recurring reminders for Tree Keepers and administrators.
- Configure schedules for watering, mulching, pruning, and check-ins.
- Manage reminder templates and recipients.
- Automate recurring maintenance communication.

6. Tree Health Surveys

- Allow Tree Keepers to report tree issues.
- Track diseases, pests, damaged bark, stake problems, and maintenance concerns.
- Store survey history with associated tree records.
- Enable issue escalation to administrators.

7. Authentication System

- Secure login using magic-link authentication.
 - Role-based access control.
 - Separate experiences for Public Users, Tree Keepers, and Admins.
-

Intended Use Cases

Administrators

- Manage tree inventory.
- Manage volunteers and Tree Keepers.
- Create and monitor reminders.
- Assign and track tasks.
- Export operational data.
- Review survey submissions and tree health reports.

Tree Keepers

- View assigned tasks.
- Receive watering and maintenance reminders.
- Submit tree health surveys.
- Report issues affecting assigned trees.

Community Members

- Explore tree planting locations through the public map.
 - Learn basic information about community trees.
 - View ECOSLO's environmental stewardship efforts.
-

Admin Manual

Accessing the Admin Dashboard

1. Navigate to the ECOSLO platform.
 2. Select "Log In."
 3. Enter your authorized email address.
 4. Open the magic-link email.
 5. Click the provided authentication link.
 6. Upon successful login, you will be redirected to the Homepage.
-

Managing Trees

Viewing Trees

1. Navigate to the "Trees" page.
2. Browse the tree inventory table.
3. Use search, sorting, and filters to locate specific trees.

Available filters include:

- Active / Graduated status
- Tree condition
- Public / Private visibility

Adding a Tree

1. Click "Add Tree."
2. Enter the required tree information:
 - ECOSLO Number
 - Species Name
 - Common Name
 - Planting Date
 - Address
 - Coordinates
 - Tree Keeper information
3. Click "Save."

Editing a Tree

1. Select a tree record.
2. Open the Edit panel.
3. Update the desired fields.
4. Click "Save Changes."

Deleting a Tree

1. Select one or more trees.
2. Click "Delete."
3. Confirm the deletion.

Exporting Tree Data

1. Click "Export CSV."
 2. Choose:
 - Export All Trees
 - Export Filtered Results
 3. Download the generated file.
-

Managing Members

Viewing Members

1. Navigate to the "Members" page.
2. Browse all Tree Keepers and Administrators.

Adding a Member

1. Click "Add Member."
2. Enter:
 - First Name
 - Last Name
 - Email
 - Phone Number
 - Role
3. Save the record.

Editing a Member

1. Select a member.
2. Update information.
3. Save changes.

Member Roles

Administrator

- Full platform access.
- Can manage trees, members, reminders, surveys, and tasks.

Tree Keeper

- Can view assigned tasks.
 - Can submit surveys.
 - Can update maintenance-related information for assigned trees.
-

Managing Tasks

Creating a Task

1. Navigate to the "Tasks" page.
2. Click "Add Task."
3. Enter:
 - Task message
 - Assignee(s)
 - Survey requirement (optional)
4. Save the task.

Completing a Task

1. Open the assigned task.
2. If no survey is required, click "Complete."
3. If a survey is required, complete the survey form.
4. The task will automatically be marked complete.

Viewing Task Status

Tasks can be filtered by:

- Open
 - Completed
 - Needs Survey
-

Managing Reminders

Creating a Reminder

1. Navigate to the "Reminders" page.
2. Click "New Reminder."
3. Configure:
 - Reminder Name
 - Recipients
 - Frequency
 - Schedule
 - Message Template
4. Save the reminder.

Editing a Reminder

1. Select a reminder from the list.
2. Click "Edit."
3. Update settings.
4. Save changes.

Deleting a Reminder

1. Open the reminder.
 2. Click "Delete."
 3. Confirm deletion.
-

Reviewing Survey Reports

Viewing Submitted Surveys

1. Navigate to the Survey section.
2. Select a survey submission.
3. Review:
 - Associated tree
 - Reported issue
 - Supporting notes
 - Uploaded image links
 - Contact request status

Common Issue Categories

- Stake Fix Needed

- Leaves Need Attention
 - Damaged Bark
 - Re-Mulch Required
 - Needs Supplies
 - Disease or Pest Issues
 - Other
-

Automated System Behavior

Tree Graduation

Trees automatically graduate after three years from their planting date.

Graduated trees:

- Remain stored in the database.
- No longer receive watering reminders.
- No longer generate recurring maintenance tasks.
- Continue appearing in historical records.

Reminder Automation

The platform automatically generates recurring reminders based on administrator-configured schedules.

Examples include:

- Weekly watering reminders.
- Annual mulching reminders.
- Annual pruning reminders.
- Tree Keeper check-in reminders.

Notification System

The platform automatically sends notifications when:

- New tasks are assigned.
 - Surveys require administrator attention.
 - Trees approach graduation status.
 - Reminder schedules are triggered.
-

Ongoing Support

- Future Hack4Impact teams should maintain documentation and support new feature requests.
 - ECOSLO administrators should regularly review reminder schedules and survey submissions.
 - Periodic check-ins with ECOSLO are recommended to evaluate adoption and operational effectiveness.
-

Maintenance & Support Recommendations

- Regularly verify reminder schedules and CRON configurations.
- Test authentication and magic-link email delivery.
- Audit exported data for accuracy.
- Review survey submissions for unresolved issues.
- Monitor database performance and storage growth.
- Collect feedback from administrators and Tree Keepers to guide future improvements.
